

ABSTRACT OF THE DISCLOSURE

A folding picnic table includes a foldable table top and two or more seats. The foldable table top is preferably supported by a table top supporting assembly that is movable between an extended position and a collapsible position. Advantageously, the table top supporting assembly can be stored in the foldable table top when the picnic table is in the collapsed position. Desirably, each seat is supported by a seat supporting assembly that is movable between an extended position and a collapsible position. Preferably the seat supporting assembly is stored in a seat when the picnic table is in the collapsed position. The table top supporting assembly can further be folded into a fully folded position when the table top is folded to further reduce the size and dimensions of the picnic table when the picnic table is in the collapsed position.
